Technical Assistance Requests for 2014

The Bear Lake SWCD has several projects they are working on. We would like to request technical assistance—comprehensive and specialized—from the Idaho Soil and Water Conservation Commission for these projects.

- ✚ Thomas Fork AFO 319 Grant---42 hours comprehensive and 176 hours specialized equaling 218 hours of assistance time. This project will consist of a waste storage facility, stream bank restoration, and offsite water.
- ✚ Stauffer Creek 319 Grant---42 hours comprehensive and 108 hours specialized equaling 150 hours. This project consists of stream bank restoration, fish friendly diversion structures, off site water, replacement of hardened crossings with bridges, and improved aquatic habitat.
- ✚ PBJ 319 Grant---42 hours of comprehensive and 20 hours of specialized equaling 62 hours. This project is to reconstruct and repair an existing structure that has washed out. It will improve the stability, operation safety, help eliminate stream bank erosion and sediment loading.
- ✚ Georgetown SRF 319 Grant---17 hours comprehensive and 20 hours of specialized equaling 37 hours. The project will be completed in the fall of 2014. The corral relocation, cross fencing, and off site water remain to be completed.
- ✚ ECC Sorensen Ditch Telemetries---42 hours of comprehensive and 38 hours of specialized equaling 80 hours. This project will help measure the water used from the Bear River and promote conservation along this stream of stream by other irrigators.
- ✚ Montpelier Irrigation Bureau of Reclamation Grant---65 hours of comprehensive assistance. The project is a ditch to pipe conversion that will stop erosion of county and state roadways.

Regards,

A handwritten signature in cursive script, appearing to read "Garth Boehme".
