## **EXECUTIVE SUMMARY:**

The Wood River Soil and Water Conservation District is one of 51 Conservation Districts in Idaho. Idaho Soil and Water Conservation Districts are political subdivisions of state government but are not state agencies. Conservation Districts are charged with carrying out a program for the conservation, use and development of soil, water, and other natural resources.

Conservation Districts are the primary entities to provide assistance to private landowners and land users in the conservation, sustainment, improvement and enhancement of Idaho's natural resources. They are catalysts for coordinating and implementing conservation programs, channeling expertise from all levels of government into action at the local level. Programs are nonregulatory; science-based technical assistance, incentive-based financial programs and informational and educational programs at the local level.

It is the goal of the Wood River SWCD to provide technical assistance to landowners and land users through Conservation District efforts. Each Conservation District in Idaho has a signed Mutual Agreement with the Secretary of Agricultural and the Governor of Idaho that establishes a framework for cooperation.

The Wood River SWCD provides an Annual Plan/Five-Year Resource Conservation Business Plan that is developed not only to guide the Conservation District, but also to encourage cooperation among landowners, government agencies, private organizations, and elected officials. Through knowledge and cooperation, all concerned can ensure a sustainable natural resource base for present and future generations in the Wood River Soil and Water Conservation District.

This document identifies the resource needs in the Conservation District and presents a resource conservation action plan for meeting these needs.

The Board of elected supervisors of the Wood River Soil and Water Conservation District on this the 30<sup>th</sup> day of March 2015, do hereby approve the following document known as the Resource Conservation Business Plan. This Plan will be in effect for a five-year period ending June 30, 2020 during which time it will be updated annually and/or amended, as necessary.

As evidence of our adoption and final approval, we do hereby affix our signatures to this document.

---

## **Organization of the Wood River Soil & Water Conservation District**

A political subdivision of the State of Idaho – authorities, powers and structure contained in Soil Conservation District Law, Title 22, Chapter 27, and Idaho Code.

The District was organized in **September 10, 1943** to provide voluntary land and water conservation technical and financial assistance to landowners and uses within the Wood River SWCD boundary.

---

## **Function of the Wood River Soil & Water Conservation District**

To make available technical, financial and educational resources, whatever their source, and focus or coordinate them so that they meet the needs of the local land manager with conservation of soil, water and related natural resources.

---

## **Who We Serve & Why**

The people who want to make informed decisions on Natural Resources within the Wood River SWCD's District boundaries. To conserve the natural resources for beneficial and sustainable use and to inform everybody of

conservation opportunities that are available.

---

## **Mission of the Wood River Soil & Water Conservation District**

To Coordinate, Inform and Educate landowners of practices & opportunities that will enhance water quality, reduce soil erosion, protect riparian areas, and enhance wildlife habitat.

---

## **Vision of the Wood River Soil & Water Conservation District**

To assist landowners in solving conservation resource problems.

---

## **Values of the Wood River Soil & Water Conservation District**

- Sustainable use of natural resources.
  - Support for agricultural activity that uses sustainable, economical and feasible practices.
  - Value and respect for the Idaho Conservation Partnership.
  - Conservation education for adults and youth.
  - Coordination with agencies and land users in the conservation and sustainable natural resources.
-

## Natural Resource Priorities and Goals:

The following priorities and goals are examples. Each Conservation District should develop priorities and goals applicable to the natural resources issues in their District.

Priorities might include:

- Animal Waste Management\*
- Carbon Sequestration
- District Operations
- Fish and Wildlife \*
- Information and Education\*
- Irrigated Cropland
- Non-irrigated Cropland
- Pasture/Hayland
- Rangeland\*
- Recreation
- Riparian
- Urban
- Water Quality\*
- Water Resources (quantity)
- Woodland
- Other – District Determined

## **SOIL CONSERVATION DISTRICT EVALUATION:**

Through a Memorandum of Understanding the Natural Resources Conservation Service (NRCS) and the Conservation District maintain an office to provide technical assistance to landowners in Lincoln County. The office is located at 217 West F Street Shoshone, Idaho.

The District has a 7 – Member locally elected Board of Supervisors and employees an Administrative Assistant.

District Board of Supervisors Include: Carl Pendleton, Buck Ward, Dan Durand, Doug Albright, Jeff Norman, Dan Van Der Muelen and Kay Billington.  
Administrative Assistant: Barbara Messick.

The District maintains a website and face book at:

[http://: www.wrswcd.weebly.com](http://www.wrswcd.weebly.com)

- Annual Budget Attached
- Annual Work Plan Attached
- List of District Partners Attached

### **USDA – Natural Resource Conservation Service**

The Natural Resources Conservation Service maintains the following staff in Shoshone or Lincoln County: District Conservationist- Patti Hurley, Soil Conservationist – Daniel Romano and Soil Conservation Technician – Katie Dennis.

### **SWC – Idaho State Soil Conservation Commission**

The Soil Conservation Commission has employed a new coordinator Rob Sharpnack who is housed in the Shoshone Field Office.

### **IDFG – STATE OF IDAHO FISH AND GAME**

The State of Idaho Fish and Game maintains the Clint Rasmussen- Mule Deer Program technician in Shoshone field office

Priorities and goals:

**1. WATER QUANTITY**

- Influencing landowners to cooperate in conserving water in sprinkler conversions.
- Working in cooperation with the Canal Co. on the Rye Grass Project.
- Dietrich Project 702/950 - Marley Project – Richfield Project.
- Working on grants to try to maintain a program coordinator.
- Continue to search for funding on the North Richfield Project while continue monitor.
- Promote and support cloud seeding and snow management.
- Attend the WAG as needed.

**2. WATER QUALITY**

- Diversion & Dam decommission on the Little Wood River.
- Commission, IASCD, NRCS & Gooding SCD.
- Thorn Creek WQPA cooperatively with Gooding SCD.
- Apply for funds and seek outside funding on the North Richfield Project while continue to monitor.
- Attend the WAG as needed.

**3. SPECIES OF CONCERN**

- To promote cost-share program in species of concern influence locally led groups to allocate funds for Rangeland improvement
- Work with BLM on weed control issues on public lands
- To promote stock water & cross fencing for better livestock management
- Develop a Land Use / Sage Grouse Plan & the Lincoln County commissioners adopted it as a resolution. Provide and be the Counties resource advisory group dealing with all natural resource concerns.
- To be pro-active in attending meetings, observing and educating in urban development.

**4. SOIL EROSION CONDITION**

- The goal is to increase knowledge base of landowners in dealing with animal waste.
- Seek alternative system for management of manure other than land application.
- To promote and support “SOIL HEALTH” attend workshops and learn more as needed.

- To promote Green Stripping with a demonstration plot on a Ranchette and Farmstead style plot.

## **5. GRAZING LANDS HEALTH**

- Seek installation of delivery system to conserve water.
- To enhance and conserve water for agriculture, wildlife and recreational purposes.
- To increase forage production and better utilize rangeland.
- To promote Sage Grouse Initiative (SGI) and other wildlife enhancements.
- To be a strong leader in grazing issues that affects our landowners.
- Promote and assist in a fire district & training Lincoln County.

## **6. WATER RESOURCES - RECHARGE**

- Facilitate and assist with landowners, canal co. and other agencies.
- Seek funding alternatives.
- Inform and Educate landowners.

## **7. DISTRICT PROCEDURES / INFORMATION AND EDUCATION**

- To operate as an effective and efficient subdivision of state government, increase the WRSCD information and education program awareness of natural resource with the quality of life in Lincoln County.

---

### **Critical Geographic Areas: (attached map)**

- **Wood River Conservation District Land Cover & Land Status Maps**

---

### **Information – Education Priorities and Goals:**

- By Mid April 5<sup>th</sup> grade students will have had the opportunity to participate in the conservation poster contest.
- By Late September all high school student will have the opportunity to participate in the WRSWCD speech contest.
- Tree Sale last weekend in April and completed by the end of May
- Promote Stewardship Week in April.
- Arbor Day Tree planting, Tree Workshops held in conjunction with Annual Tree Sale. “Trees Against the Wind” Project

- By May all Conservation District cooperator addresses and files will be updated.
- Students taught about trees and the different species we sell at the Annual Tree Sale.
- Presentations and scholarships available for NRC camp.
- Contribute to Forestry and Soil Contest.
- Sponsor Envirothon team annually.
- Continue to sponsor the Lincoln County Southern Idaho Bio Program or SIBC.
- Work with Tri- County weeds, BLM, and Bug Crew to control noxious weeds in Lincoln County.
- Continue to sponsor workshops when needed ( Sage Grouse Conservation Tools meeting (November 24<sup>th</sup> 2014)

---

#### **District Operations Priorities, Goals:**

- Supervisor Training available!
- In cooperation with other Conservation Districts develop and carry out an effective legislative outreach program to ensure 90% State matching funds for all Districts.
- Conduct Conservation District elections in November 2015.

---

#### **Trends Impacting Conservation in the Wood River Soil & Water Conservation District**

- Urban impact on agriculture production.
- Poorly planned urban growth in agricultural areas.
- Increasing small acreage farms, five acres or less.
- Limited availability of State funds for conservation.
- Focus on water quality compared to other conservation and environmental issues.
- Increased paper work to getting the job done.
- Trends to regulate agriculture and ranching.
- Poor weed control within the sub development areas.

---

#### **Strategies to Address Trends**

- Continue to apply for funding through grants and other opportunities.

- More education but not the usual – more outreach instead of publications.
- Determine opportunities to coordinate outreach activities with traditional and non-traditional partners.
- Raising awareness of conservation values with state legislature and elected officials – help decision makers be better informed.
- Strengthen Locally Led efforts.
- Supervisors become more informed on current issues impacting working lands, Farm Bill programs, Information from agencies. instead of relying on NRCS District conservationist.
- Determine how to become involved with County Planning and Zoning issues impacting natural resources.
- Map noxious and invasive weeds to more effectively target weed control efforts.
- Establish a data base to track resource conditions.
- Host an open house to make public aware of goals.
- Solicit input to improve Annual Plan/Five-Year Resource Conservation Business Plan.
- Take a proactive approach to funding water delivery systems on irrigated cropland.
- Identify the information methods to communicate with small land owners in the area.
- Sponsor project proposals with other districts.
- Training for District Supervisors and staff on new programs and administration for natural resources conservation.

---

### **Staffing Needs**

- Conservation District Manager with benefits.
- Full-time Conservation District Administrative Assistant with benefits.
- Conservation District Technician and Planner.

---

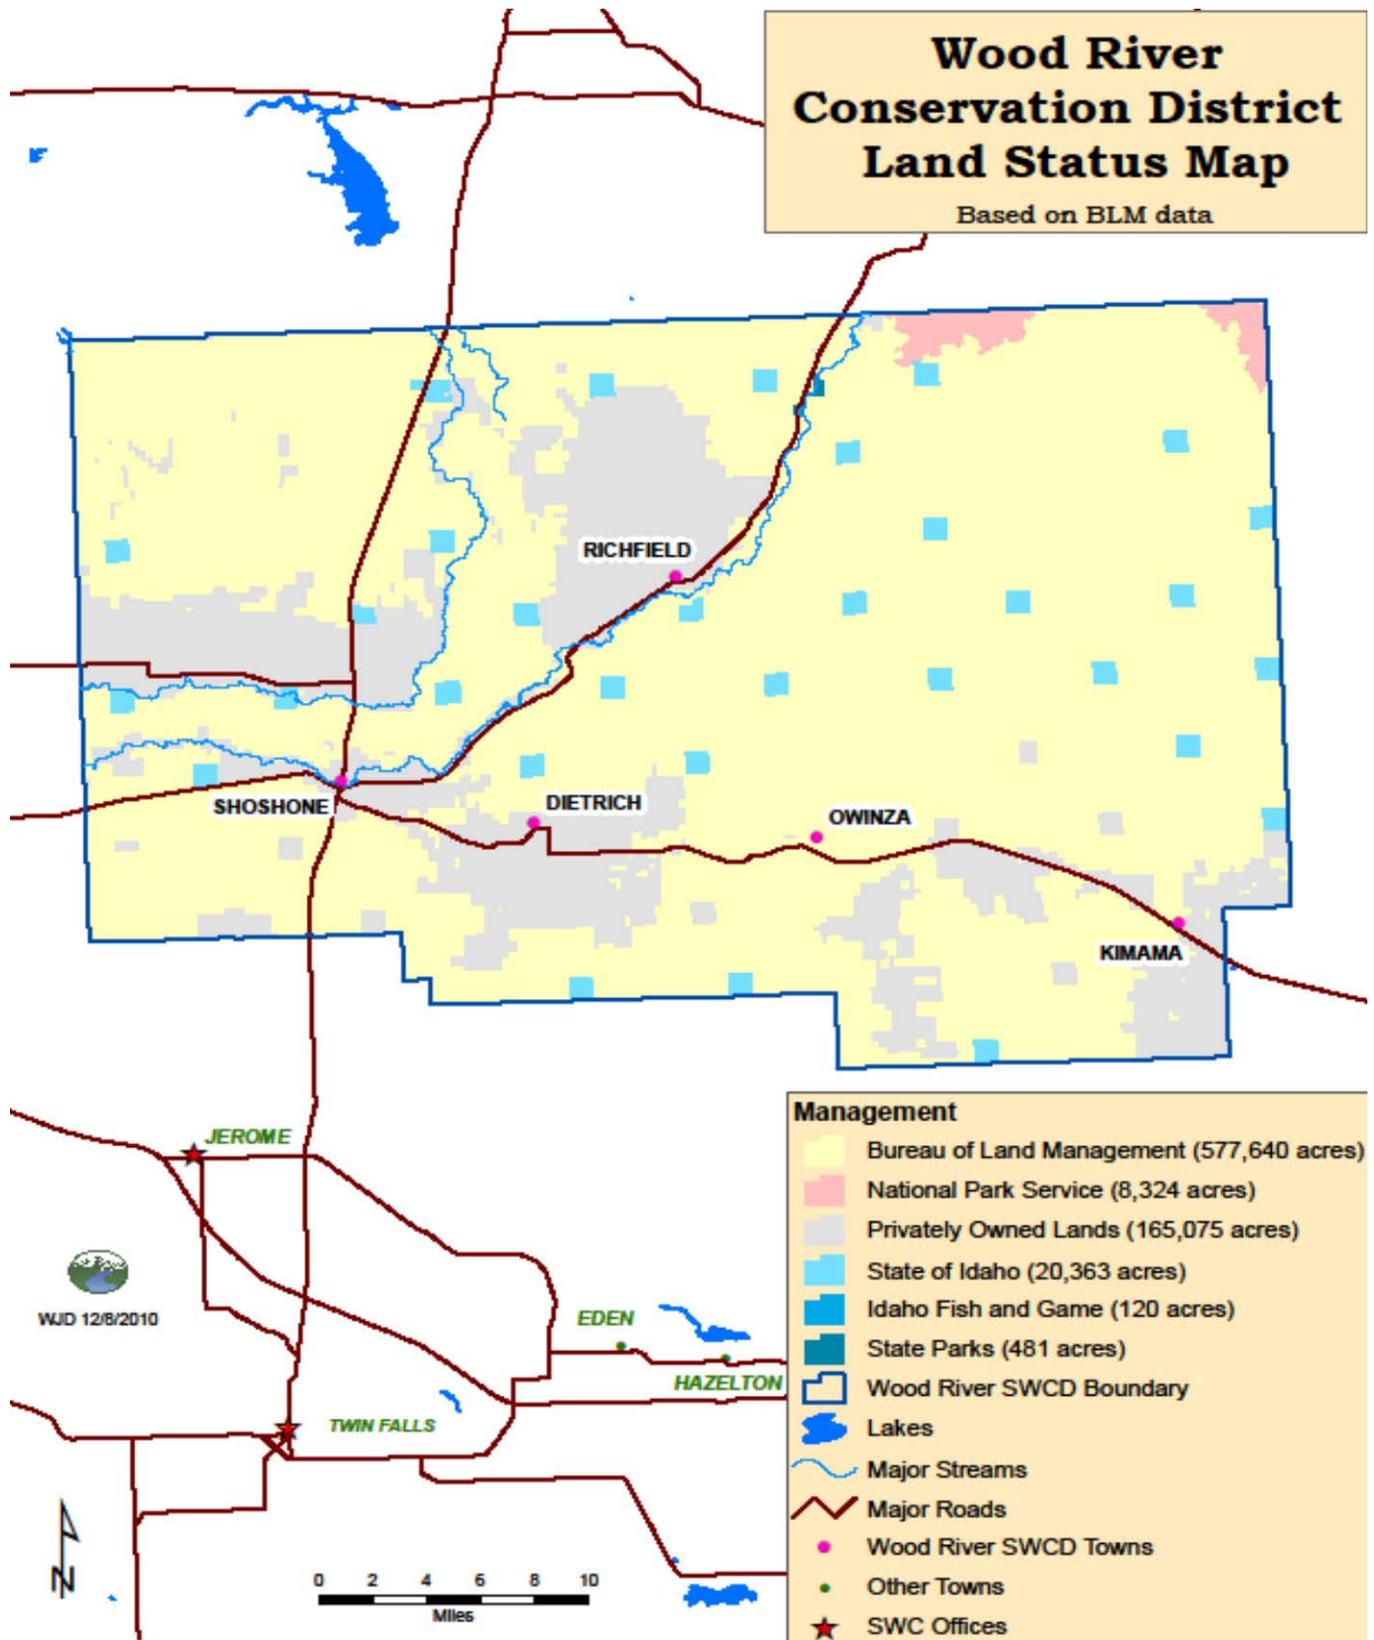

### **Key Decision Makers**

- Citizens in Conservation District
- Lincoln County Commissioners Board Members Chairperson , Roy Hubert, Cresley McConnell and Rebbeca Wood

- State legislators representing Conservation District: Senator, Michelle Stennett;
- Representative, Steve Miller; and Donna Pence, Representative
- University of Idaho Extension; Steve Hines
- Big Wood Canal Company - Lynn Harmon;
- 37 37M Water District – Kevin Lakey

## Work Force Trends

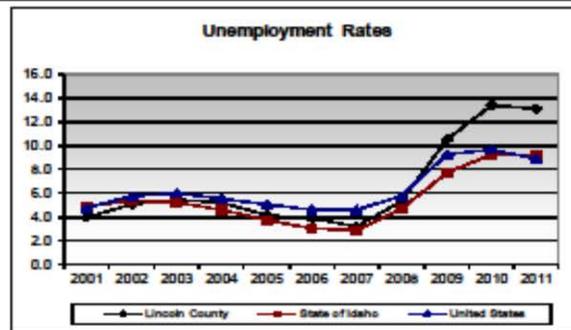

### Population

Lincoln County's population has risen 29 percent in the last 10 years, keeping pace with other growing counties in the region. The city of Shoshone, considered the gateway to Sun Valley, is the county seat with a population of 1,461. Lincoln County continues to rely on agriculture with several large scale dairies contributing to the industry's regional growth. Manufacturing was nearly non-existent prior to Glanbia Food's whey processing plant in Richfield, 14 miles east of Shoshone, and Rocky Mountain Hardware, which machines brass fixtures in Shoshone. As a bedroom community to both the Wood River Valley and Twin Falls, workers have an easy commute. Affordable housing continues to be an issue in the Wood River Valley so subdivisions and residential construction will continue in Shoshone, where sustainable growth is expected over the long term. Currently there is an inventory of building lots.

### Labor Force & Employment

Unemployment has been a roller coaster in Lincoln County. The seasonally adjusted rate originally peaked at 5.6 percent in 2008 from a record low of 3.2 percent in 2007. During six of the last 10 years, the unemployment rate has exceeded 5 percent. Since the economic downturn, unemployment has reached unprecedented levels with a major loss of construction jobs pushing it to 13.4 percent in March 2011 – well above the state and national rates. Economic diversification has created new jobs but mostly in the service sector. Dairies have brought stability to traditional seasonal jobs in tourism, landscaping and agriculture. More retail is popping up to serve the highway traffic between Twin Falls and the Wood River Valley. Whey processing jobs in Richfield are stable, and manufacturing is gaining ground and raising area wages. Hay, grains, corn and other crops that can be green

chopped for dairy silage are the primary commodities. The U.S. Bureau of Land Management's regional headquarters and the National Interagency Fire Center dispatch operation are seasonal employers. The surrounding small communities all saw interest in new housing prior to the downturn. The county is expected to continue steady growth when the economy rebounds and those higher-paying jobs return to Blaine County.

Labor Force	Dec 10	Dec 11
Civilian Labor Force	2,614	2,575

### Heating Cost Index

### Cooling Cost Index

The Heating Cost Index and the Cooling Cost Index are indicators of the relative heating and cooling cost of an area. They were calculated based on the average temperature and duration of the hot and cold days for the area. Please note, the actual heating cost and cooling cost are also dependent on other factors specific to individual residences such as the size of the house, the insulation condition, and the equipment efficiency, etc.

(D) Cannot be disclosed. (Z) Less than half of the unit shown.

<sup>1</sup> Universe is number of counties in state or U.S. with item. <sup>2</sup> Data were collected for a maximum of three operators per farm.

## Big Wood River Watershed Management Plan at a Glance

<b>Hydrologic Unit Code</b>	17040212
<b>Size (Total)</b>	1,496 square miles (957,495 acres)
<b>(Lincoln County portion)</b>	
<b>303(d) Listed Stream</b>	Big Wood River (segments 5,6) Thorn Creek
<b>Segments</b>	
<b>Beneficial Uses Affected</b>	Cold water aquatic life, salmonid spawning, primary and secondary contact recreation
<b>Big Wood Segments 5,6</b>	
<b>Thorn Creek</b>	Cold water aquatic life, primary contact recreation, special resource water
<b>Pollutants of Concern</b>	
<b>Big Wood Segments 5,6</b>	Sediment, nutrients, dissolved Oxygen
<b>Thorn Creek</b>	Sediment, nutrients
<b>Major Land Uses</b>	Range, agriculture
<b>Date Approved by U.S. EPA</b>	May 2002
<b>Draft Addendum Public Comment Period</b>	February 22 - March 30, 2007

Section 303(d) of the Clean Water Act establishes requirements for states and tribes to identify and prioritize water bodies that are water quality limited (i.e., water bodies that do not meet water quality standards). States and tribes must periodically publish a priority list of impaired waters, currently every two years. For waters identified on this list, states and tribes must develop water quality improvement plans known as total maximum daily loads (TMDLs) that establish allowable pollutant loads set at levels to achieve water quality standards.

### Overview

The overall purpose of this subbasin assessment and TMDL is to characterize and document pollutant loads within the Big Wood River Subbasin. Twenty stream segments on the §303(d) list were evaluated; an additional four stream segments that were not on the §303(d) list were also evaluated.

The document recommends that four streams (Horse Creek, Owl Creek, Baker Creek, and East Fork Wood River) be removed from the §303(d) list. These streams are meeting their beneficial uses and/or state water quality standards.

The document also recommends two additional streams segments be listed on the next §303(d) list. The first is in the Big Wood River mainstem from Base Line to Magic Reservoir. The second is in the Big Wood River mainstem from Interstate 84 to the Snake River (or the Malad River).

TMDLs were established for sediment, nutrients, and bacteria. Flow alteration will be evaluated further. A TMDL was not being established at this time for streams polluted by nitrite + nitrate. Temperature and dissolved oxygen TMDLs will be deferred until 2003 pending collection of more information. A TMDL was not established for turbidity at this time since the sediment TMDLs will create reductions in turbidity. The TMDL recommends that ammonia be delisted as a pollutant of concern.

### Background

The federal Clean Water Act requires that states and tribes restore and maintain the chemical, physical, and biological integrity of the nation's waters. States and tribes must adopt water quality standards necessary to protect fish, shellfish, and wildlife while providing for recreation in and on the waters whenever possible.

Streams and Pollutants for Which TMDLs Were Developed

Big Wood River      Sediment, nutrients, bacteria

Thorn Creek      Sediment, nutrients

Little Wood

Section 303(d) of the Clean Water Act establishes requirements for states and tribes to identify and prioritize water bodies that are water quality limited (i.e., water bodies that do not meet water quality standards). States and tribes must periodically publish a priority list of impaired waters, currently every two years. For waters identified on this list, states and tribes must develop water quality improvement plans known as total maximum daily loads (TMDLs) that establish allowable pollutant loads set at levels to achieve water quality standards.

**Surface Water: Little Wood River Subbasin Assessment and Total Maximum Daily Loads**

> [Link to document](#)

The Subbasin at a Glance

**Hydrologic Unit Code**      17040221

**Size (Total)**      1,132 square miles

**(Lincoln County portion)  
303(d) Listed Stream  
Segments**      Little Wood River (segment 4)

**Beneficial Uses Affected**      Cold water aquatic life, salmonid spawning, secondary contact recreation

**Pollutants of Concern**      Temperature, sediment, nutrients

**Major Land Uses**      Range, agriculture

**Date Approved by U.S. EPA**      September 2005

Overview

The Little Wood River Subbasin lies in south-central Idaho. The river originates in the Pioneer Mountains of the Sawtooth National Forest and discharges in the desert plains at the Big Wood River.

Nutrients were measured in the form of total phosphorus and total inorganic nitrogen. High annual averages of total inorganic nitrogen, combined with elevated total phosphorus levels indicate that nutrients could be at levels that are capable of contributing to nuisance aquatic growth. Nutrient TMDLs have been completed for Fish Creek (both above and below Fish Creek Reservoir) and for the Little Wood River from Silver Creek to the Big Wood River.

Sediment was measured in the water column as total suspended solids and as percent fines. Where it was found that percent fines were elevated, stream bank erosion inventories were completed to determine if stream banks were the source of the sediment.

Background

The federal Clean Water Act requires that states and tribes restore and maintain the chemical, physical, and biological integrity of the nation's waters. States and tribes must adopt water quality standards necessary to protect fish, shellfish, and wildlife while providing for recreation in and on the waters whenever possible.

Stream bank erosion TMDLs for sediment were completed on Dry Creek, both segments of Fish Creek, and the Little Wood River from Silver Creek to the Big Wood River.

Bacteria and temperature are both numeric water quality standards and, as such, have numeric values that have to be met. Where

numeric bacteria standards were exceeded, additional samples were collected; a bacteria TMDL was completed for Fish Creek above Fish Creek Reservoir.

Where water temperatures were elevated, the canopy cover of the water bodies was measured to develop TMDLs. Temperature TMDLs were completed on Loving Creek, Muldoon Creek, both segments of Fish Creek, and the Little Wood River.

Flow alteration has been identified as pollution for many of the water bodies. However, the U.S. Environmental Protection Agency does not believe that flow alteration is a pollutant as defined by the Clean Water Act. Since TMDLs are not required for water bodies impaired by pollution but not pollutants, TMDLs were not developed for flow alteration. The water bodies with flow alteration have been identified as such and put on a list of water bodies polluted by flow alteration.

Where biological and water chemistry data indicated that beneficial uses were being fully supported, those water bodies were proposed for removal from the §303(d) list. Both Fish Creek Reservoir and Little Wood River Reservoir were recommended for removal.

#### Streams and Pollutants for Which TMDLs Were Developed

Little Wood River to Big Wood River) Sediment, nutrients, temperature.

**FY- 2015 (7/1/2014 – 6/30/2015) Annual Plan of Work  
WOOD RIVER SOIL & WATER CONSERVATION DISTRICT**

**Conservation District Priority Number 1: WATER QUANTITY**

Goal(s): Seek Installation of delivery system while conserving water.

Objective: Protecting and Enhancing the Quantity of our Water Resources Milner / Gooding Canal north view

Actions:	Target Date	Individual(s) Responsible
Specific measurable practices or actions attain goals Seek EPA 319 grants and other water quality sources of funding	2015	Board of Supervisor Admin. Asst
To work with Big Wood Canal Co. to promote and coordinate pipeline projects: 950 E Road 702 – A-Lateral Dietrich Pipeline Project; Marley Pipeline Project; East Richfield Pipeline Project 1& 2, Richfield Town Project, Blaine Project, North Shoshone Project RE-CHARGE - Promote and encourage re-charge	2015	Board of Supervisors NRCS Administrative Assistant
Participation on Locally Led Groups	Annually	Board of Supervisors
Inform and Educate public through newsletters and articles etc.	2015	Board of Supervisors
To encourage sign ups by cooperators through CCPI & RCPP	2015	Board of Supervisors
Promote Cloud Seeding and other Snow Enhancements.	2015	Board of Supervisors

**Wood River Soil Conservation assisting land managers with their conservation choices**

**FY- 2015 (7/1/2014 – 6/30/2015) Annual Plan of Work  
WOOD RIVER SOIL & WATER CONSERVATION DISTRICT**

**Conservation District Priority Number 2: WATER QUALITY**

Goal(s): To reduce sediment and phosphorus runoff into the Big Wood River & Middle Little Wood River with the conversion of surface to sprinkler Irrigation.

Objective: Seeking landowners to promote Water Quality on the Little Wood River.

Actions	Target Date	Individual(s) Responsible
Apply for additional grant funds & seek outside funding if required to implement BMP's	2015	IASCD / Planner Carl Pendleton Barbara Messick
Administer and implement BMP's	2015	Board of Supervisors IASCD/ Planner
Glanbia Mitigation Funding for possible landowners / Jeff Ward & Offer Inbar Irrigation structure removal to improve temperature, fisheries and stream flow.	2015	DEQ / IASCD/ Planner Board of Supervisors
Continued monitoring by DEQ / IDA on select sights along J.B. Slough	2015	IASCD / Planner Board of Supervisors
Continue to Investigate potential Glanbia projects on the Little Wood River.	2015	Supervisors NRCS Administrative Asst

**Wood River Soil Conservation assisting land managers with their conservation choices**

**FY- 2015 (7/1/2014 – 6/30/2015) Annual Plan of Work  
WOOD RIVER SOIL & WATER CONSERVATION DISTRICT**

**Conservation District Priority Number 3: SPECIES OF CONCERN**

Goal(s): To increase the forage production and better utilize Rangeland with specific measurable practices or actions to attain goals!

Objective: To protect Rangeland with installation of total RMS plans using BMP's.

Actions	Target Date	Individual(s) Responsible
To promote cost-share programs in species of concern Influence locally led groups to allocate funds for Rangeland improvement	2015	Board of Supervisors Carl Pendleton NRCS
Work with BLM on weed control issues on public lands	2015	Board of Supervisors Admin. Assistant
To promote stock water & cross fencing for better livestock management	Annually	Board of Supervisors Admin. Assistant
Work with the Tri-County weed supervisors to publicize cost-share alternatives.	Annually	Board of Supervisors Admin. Assistant
Developed a Land Use / Sage Grouse Plan & the Lincoln County Commissioners adopted it as a resolution. Provide and be the Counties resource advisory group dealing with all natural resource concerns.	Annually	Board of Supervisors NRCS
Continue to be pro-active in attending meetings, observing and educating in urban development. Looking at Candidates for Conservation Assurances Agreements by the US Fish and Wildlife as an option for landowners and assurances.	2015	Board of Supervisors NRCS

**Wood River Soil Conservation assisting land managers with their conservation choices**

**FY- 2015 (7/1/2014 – 6/30/2015) Annual Plan of Work**  
**WOOD RIVER SOIL & WATER CONSERVATION DISTRICT**

**Conservation District Priority Number 4: SOIL EROSION**

**Goal(s):** To increase knowledge base of landowners in dealing with animal waste and inform the public about those applications i.e. CCPI, RCPP, EQIP and WQPA.

**Objective:** Seek alternative system for management of manure other than land application.

Actions	Target Date	Individual(s) Responsible
Contract with landowners	2015	Board of Supervisors NRCS & Barbara
Inform and Educate the Public ( Trees Against the Wind Project)	2015	Board of Supervisors NRCS & Barbara
Participate on locally led groups	Annually	Board of Supervisors NRCS & Barbara
Promote SOIL HEALTH (Workshops, experimental plots etc.)	2015	Board of Supervisors NRCS & Barbara
To encourage sign ups by cooperators	2015	Board of Supervisors
Pasture & Grazing Management Workshop	2015	Board of Supervisors U of I Extension

**Wood River Soil Conservation assisting land managers with their conservation choices**

**FY- 2015 (7/1/2014– 6/30/2015) Annual Plan of Work  
WOOD RIVER SOIL AND WATER CONSERVATION DISTRICT**

**Conservation District Priority Number 5 : GRAZING LANDS HEALTH**

Goal(s): To enhance and conserve water for agriculture, wildlife and recreational purposes.

Objective: To seek installation of delivery systems to conserve water.

Actions	Target Date	Individual(s) Responsible
Articles in newsletters & News papers	Annually	Barbara Messick
To assist landowner in developing and funding BMP's (EQIP & State WQPA)	2015	Board of Supervisors
Inform the public on conservation programs & practices available. Promote (Sage Grouse Initiative) and other wildlife enhancement's.	2015	Board of Supervisors
Continuing to move forward in the planning process with 2 landowners north of Shoshone in a Green Stripping Demonstration Plot.	2015	Barbara Messick Board of Supervisors NRCS, SWC
Partnered with NRCS to hold Grazers Gathering workshop the first Friday of every month through March of 2014.	2015	Barbara Messick Board of Supervisors NRCS
To assist landowners in developing and funding BMP's	2015	Board of Supervisors

**Wood River Soil Conservation assisting land managers with their conservation choices**

**FY 2015 (7/1/2014– 6/30/2015) Annual Plan of Work  
WOOD RIVER SOIL & WATER CONSERVATION DISTRICT**

**Conservation District Priority Number 6: DISTRICT PROCEDURES  
INFORMATION & EDUCATION**

**Goal(s):** To operate as an effective and efficient subdivision of State Government / Increase the WRSCD Information and Educational program awareness of Natural Resources with the quality of life in Lincoln County.

**Objective:** To reach the ideal state of our resources and utilize them wisely to promote Idaho partnership through Conservation programs. Implementation of I&E programs to public school systems and local landowners promoting the Idaho partnership of conservation programs.

Actions	Target Date	Individual(s) Responsible
Review / Update District Policy and Procedures Manual	2015	Admin. Assistant
Schedule and hold monthly Board Meetings	Monthly	Admin. Assistant
Develop and submit Conservation District Annual Plan of Work / Annual Reports	2015	Admin. Assistant
Develop and submit Conservation District Budget	2015	Admin. Assistant
Continue to support Capitol Displays with local projects and information.	2015	Admin. Assistant

**Wood River Soil Conservation assisting land managers with their conservation choices**

To sponsor Conservation tours and workshops when appropriate Weed Management Workshop – Hispanic Workshop – Soil Health Workshops	2015	Admin. Assistant
To support Conservation activities through information and educational programs within Lincoln County Schools.	2015	Board of Supervisors Admin. Assistant
To Support RC&D and Southern Idaho Bio Weed Control	Seasonal	Board of Supervisors Admin. Assistant
ARBOR DAY CELEBRATION & TREE SALE	2015	Board of Supervisors Admin. Assistant
Lincoln County Fair & Booth, Conservation Farmer of the Year	2015	Board of Supervisors Admin. Assistant
Newsletter and Articles when and if prompted by on-going activities	2015	Board of Supervisors Admin. Assistant
Update and maintain current Website – Social media / Face book & Blog	Monthly	Board of Supervisors Admin. Assistant
